Transport in the city

Now Warsaw has not a very efficient public transport due to the massive renovations of major streets. A vast majority of the street are blocked and traffic jams are almost all day long.

Moving around Warsaw is generally safe even at night, but as in any other large city, it is worth paying attention to your personal safety. Pickpockets and luggage are the major risk. Please be careful of your personal belongings, especially in the most touristic areas in the centre and in crowdie public transport - especially bus No. 175, No. 100 and trams.

We also do not recommend to use services of other non-corporate taxi services offered at the city, especially at airport and on the central station.

Insurance

In case of any medical accidents all participants coming from EU should have their European insurance card valid in EU. All participants coming out of EU should have their medical insurance for foreign journey and in case of any accident, they should ask in a medical point, that will attend them (hospital, clinic, health centre) for an invoice. In this case a medical treatment should be paid cash and received back at home or any other way depending on the insurance (eg. insurance company money transfer).
